Our Pricing

Our course development typically falls into 3 categories. Prices may vary based on course complexity.

Basic- level 1

Starting at \$1000/60 minutes

- Articulate Rise Development
- Modern User Interface
- Updated Course Graphics
- Standard Articulate Rise Interactions
- Mobile Responsive Design
- Stock Photos and Illustrations
- Quiz Development

Plus-level 2

Starting at \$2,500/60 minutes

- Articulate Storyline Development
- Course Storyboarding
- Professional Narration
- Standard Storyline Interactions
- Quiz Development
- Modern User Interface
- Mobile compatible
- Stock Photos and Illustrations

Premium -level 3

Starting at \$4000/60 minutes

- Advanced Storyline Interactions
- Course Storyboarding
- Professional Narration
- Custom Scenario Development
- Custom Graphics and Illustrations
- Branching Scenarios
- Gamification Available
- Custom Animated Video

Frequently Asked Questions

- **What do I need to get started with you on a new project?**

We'll help you find the right solution no matter what stage of the process you are in. So whether you have a detailed course outline and storyboard or you have some content references or guidelines floating around in your head, we can start from there.

- **How long does it take to build a course?**

Good question! It all depends on the length of the course and how much of your material is already prepared for development. We suggest allowing 2 weeks for each thirty minutes of finished course material for a Level 1 course. And 1 month for each 30 minutes of Level 2 and 3 courses.

- **How do we get started?**

Just reach out to schedule a 30-minute Discovery Call. We'll ask you a little about your project and content. Then we'll put together a detailed development estimate. No commitment is necessary on your part.

- **Can I put the course on our own LMS (Learning Management System)?**

Short answer? Yes. As long as your LMS supports SCORM 2004, SCORM 1.2, AICC, or Tin Can, your eLearning course will be able to speak to your LMS. Just to be sure though, we'll verify that the course functions correctly in our Prototyping phase.

- **Will the course be mobile compatible, or responsive?**

Yes! All of our Articulate Storyline courses are mobile compatible and will work on all computers, tablets, and smartphones. However, if you're looking for a mobile 'responsive' course that is designed specifically for mobile devices, we suggest using Articulate Rise for your course development. And guess what. We do that too!
